

HEPA AIR FILTER - 1000CFM AIR SCRUBBER

61Kg, 51cm × 58cm × 102cm

The HEPA 1000 is a great Hepa Air Scrubber with superior performance. Perfect for use in larger areas – living rooms, offices and larger construction projects.

TYPICAL USES:

- Mould and Indoor Air Cleanup- Remove dangerous mould and VOC's from the air in contaminated spaces and are a vital component of decontamination.
- Restoration and Construction- Used to filter out floating particles and dust, necessary for most remediation works under IICRC guidelines.
- Allergy, Dust and Soot Control- HEPA Air Scrubbers are perfect for helping make the air safer after fires; and can reduce allergy and dust reactions by removing particles from the air.
- Clean Rooms and Server rooms- Used to keep floating particles to a minimum and ensure airborne contaminants are captured safely without compromising room cleanliness.
