

COMPACT DEHUMIDIFIER 63L

29Kg, 53cm H x 30cm W x 44cm D

These units are incredibly powerful dehumidifiers for their small stature, with a high cost-to-benefit ratio. Suitable for commercial or residential applications.

TYPICAL USES:

- Void Space Dehumidification- e.g. ceiling spaces, cupboards, limited access areas. Due to its compact size, these dehumidifiers work well in spaces where access is limited.
- Water Damage Restoration- Although small in size, our compact dehumidifiers are designed to be just as efficient as bigger models, and can be reliably used as a dehumidifier for water damage.
- Corrosion Control- These units will work well with smaller metal objects that require blasting or coating. These dehumidifiers can control the humidity in the environment to enable these works.
- Structural Drying- As it is classed as a Low Grain Refrigerant, these units can achieve a lower humidity level than non-LGR models. This makes it effective at drying building and structural materials that have deeply bound water in them.

Specifications

Operating Range	21-32°C
Moisture Removal MAX	64L /day
Current Consumption (Amps)	3.2
Power Supply (V / hz)	230 / 50
