

LARGE DEHUMIDIFIER 91L

49kg, 85cm H x 51cm W x 51cm D

High-performance units for any medium-large scale drying job. Capable of removing large volumes of water. Complete with handy LCD panel.

TYPICAL USES:

- Water Damage (Carpet and Structure)- Due to its LGR rating, these units can remove humidity to a much lower level than our 60L dehumidifier. This makes this unit great for drying deeply bound water.
- Corrosion Control- This unit will suit corrosion control works by lowering the humidity to enable work such as blasting or coating.
- Construction Drying- Using an LGR dehumidifier such as this enables you to remove water from the environment to a lower level than non LGR units. This makes it perfect for construction drying where water may be more deeply bound than residential water damage.
- Prevent Mould Growth- By lowering the humidity in the environment, you can prevent further mould growth.

Specifications

Operating Range	21-32°C
Moisture Removal MAX	91L /day
Current Consumption (Amps)	4
Power Supply (V / hz)	230/50
