

TRAMEX CONCRETE MOISTURE METER

357g, 180mm H × 85mm W × 40mm D

Tramex Concrete moisture meter is perfect tool for non-destructive and instant moisture reading in concrete as per ASTM F2659. This moisture meter detects the moisture levels within a concrete slab non destructively by measuring the electrical impedance upon contact.

TYPICAL USES:

- Concrete Surface Testing- Surface level moisture readings for sealants and surface treatments.
- Slab Drying- Ensure concrete slab is dry to relevant building and construction standards.
- Moisture Consistency- Check areas of concrete slab for consistent moisture levels.
- Carpeting and Flooring- Measure dryness before installing carpets and flooring.

Specifications

Concrete Moisture Measuring Range	0 - 6.9%
Concrete Penetration Depth	Approx. 20mm
Power Supply	2 x AALR6 ALKALINE (included)
Dimensions	180mm H × 85mm W × 40mm D
